**NEW HAMPSHIRE**  
COUNCIL ON PROBLEM GAMBLING

## MISSION:

The New Hampshire Council on Problem Gambling, is a private non-profit agency created to address the social, financial and emotional costs of problem gambling. The Council provides information, education, advocacy and prevention services as well as referrals to treatment for problem gambling to those afflicted, their loved ones and the community.

# THE NEW HAMPSHIRE COUNCIL ON PROBLEM GAMBLING PROVIDES:

## INFORMATION

Presentations on problem gambling that identify the signs, symptoms and the repercussions attributable to this addiction and to its effect upon the gambler and those whose lives are impacted by his/her choices and behavior.

## EDUCATION

Trainings designed to educate the public in regard to problem gambling are offered to audiences representing legal, educational, social service, public safety and religious communities. Professional trainings for credentialing are also available.

## PREVENTION

In conjunction with licensees and other addiction professionals, we seek to prevent problem gambling behavior and arrest the cycle of addiction. Special presentations are available to assist employers in identifying problem gamblers and their workplace behavior. Prevention presentations are available for adolescent, college, senior, and criminal justice populations.

## INTERVENTION

Acting on referrals or helpline calls, we can initiate a meeting with the problem gambler with the goal of steering the individual towards treatment of the problem. Additionally, we can assist those affected by the gambler with understanding and provide information to minimize the gambler's impact on their lives.

## TREATMENT

The Council will initiate the treatment process with referrals to self-help groups, addictions professionals and licensed treatment providers to offer clinical and supportive services for the gambler and his/her family.

## RESEARCH

The Council will work with research professionals as they strive to learn more about problem gambling, its causes and effects and to develop the most effective treatment.
